

2. Feature

Use it to enhance your surveillance environment.

Clip-Copy

For efficient surveillance, video clips can be saved as an executable file containing a self-player.

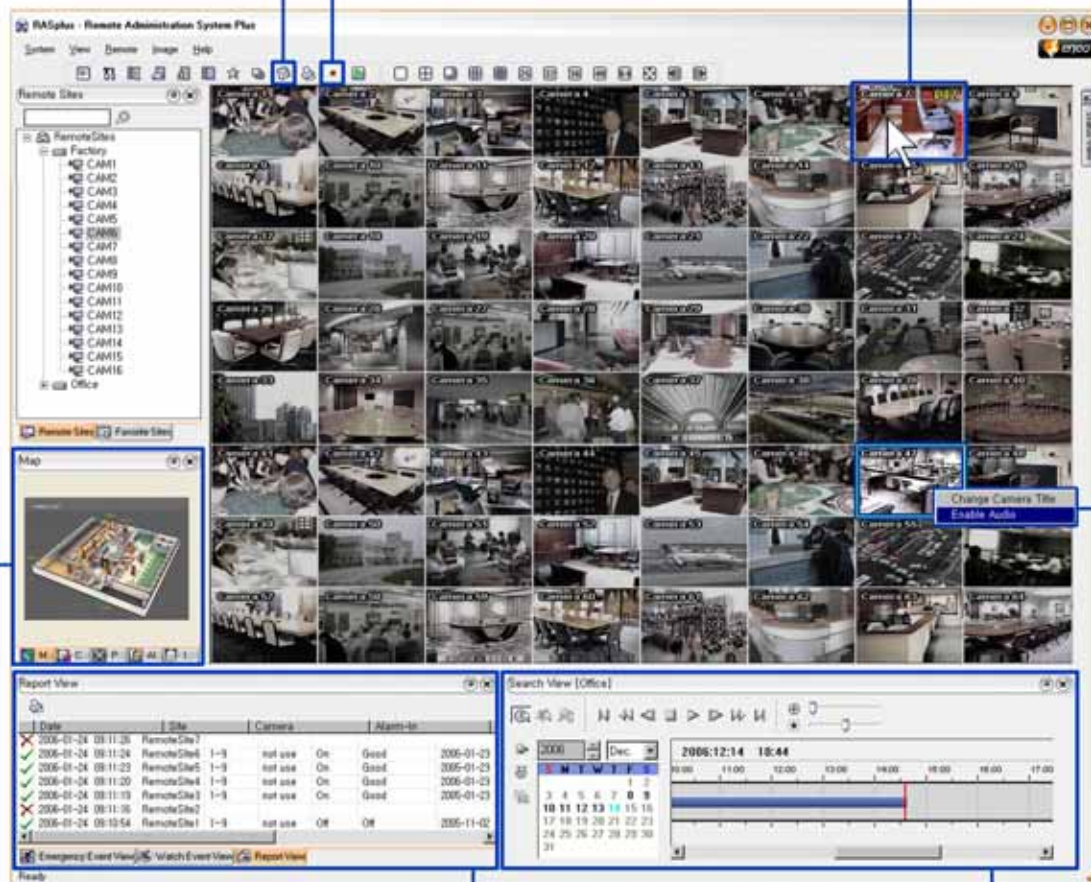

Panic Recording

Live video on the screen can be recorded by one click of the panic button.

Mouse PTZ Control

PTZ cameras can be controlled conveniently using a mouse.

Map Integration

Monitoring of remote sites on a 3D map provides the user with intuitive surveillance environment. Map shows the system status and also alerts the user when events occurred.

Detailed Timetable Chart Search

Just mouse-clicking on the timetable chart makes it easy to retrieve recorded video.

System Health Monitoring for Multi-Site

For multiple remote site management, continuous monitoring for all remote systems and prompt reporting their status are supported.

Two-way Audio Communication

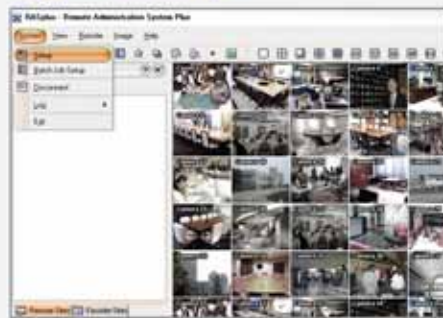

Two-way audio communication between the RASplus system and the remote system is provided.
